# Lunch & Learn Seminars

*Where the teaching comes to you!*

## Topic: Steam Trap Fundamentals

Have you ever been unsure of where to use a steam trap? Or how to choose the correct size for an application? Do you specify a certain type “because that’s how we’ve always done it...?” Have you had enough of the smoke and mirrors often associated with these simple yet essential steam system components?

Here’s an opportunity to blow away the smoke and shatter the mirrors. Proctor Sales is pleased to offer a noontime seminar that will help you understand what they do, how they work, and the relative strengths and weaknesses of the various types of steam traps. You’ll come away knowing why there’s a best type to meet the needs of a given application. Whether you’re a rookie taking a first look at steam system design, or a seasoned veteran looking to brush up on the basics, you’re sure to find something useful in this informal session over lunch.

### Session Outline

- What steam traps do
- How they work
- Steam distribution piping applications
- Heat exchanger applications
- Avoiding potential pitfalls

**Let us come to you!**

**This one hour presentation is being offered at your location.**
